

## O&M Electrician

### Introduction to SOLA

The SOLA Group is a vertically-integrated provider of renewable energy solutions, aiming to transform Africa through clean energy. With over 13 years of experience, SOLA's expertise lies in the origination, development, financing, engineering design, project management and Operations and Maintenance of renewable energy facilities. For more information, visit [www.solagroup.co.za](http://www.solagroup.co.za).

### The overall purpose of the position:

Two Solar PV Plants 100MWac each (130 MWdc and 126 MWdc each respectively) with ground mount tracking systems are about to enter into Operations, but are currently being commissioned in the Lichtenburg area. The position would require fault/failure investigation, repair, planned and unplanned maintenance of equipment as well as reporting, all while adhering to the HSE requirements.

Reports to:	O&M Plant Manager
Location:	Lichtenburg, North West Province
Contract type:	Permanent Contract
Number of positions:	3

### Summary of Responsibilities:

- Conduct preventative and corrective maintenance activities
- Conduct repairs and replacement of components
- Conduct switching activities on low voltage and medium voltage (typical 33kV/132kV) electrical networks
- Follow method statements and direction from the O&M Plant Manager and Senior Technicians
- Attend to defects, conduct fault finding
- Oversee contractors (e.g. vegetation and module washing) when required
- Write/contribute to investigation reports, fill out incident documentation
- Ensure that HSE requirements are adhered to - maintain a clean and safe working environment
- Log faults and utilize the monitoring software
- Ensure that the quality of work performed is aligned with reasonable expectations of a competent and qualified Electrician
- Willing to work standby/Overtime as per the company policy requirements.

### Key Performance Indicators

- Planned and unplanned maintenance completed
- Time to resolve technical breakdowns and tickets
- HSE compliance and statistics
- Spare part inventory management

### Minimum Requirements:

- Must be a qualified Electrician/Artisan/Millwright and therefore have passed the required trade test
- Minimum N3 academic qualification (Electrical/Mechanical/Civil)
- Must have solar installation or solar operations experience (1+ years), preferably with large scale installation and tracking systems
- Knowledge of SCADA / PLC and communication systems will be advantageous
